SEED PITCH · CONFIDENTIAL

Gentle Reminder

The clinical-grade dementia care platform

23 patented innovations. $186B market. FDA SaMD pathway.

Christo Mac · Founder & CEO/COO
mack@matrixadvancedsolutions.com · https://gentle-reminder-pitch.vercel.app

THE PROBLEM

Dementia care is broken.

55M+

People with dementia globally. 10 million new cases annually. $1.3T in costs.

Standard cognitive tests — MMSE, MoCA, ADAS-Cog — produce **pass/fail feedback that triggers anxiety, agitation, and session abandonment** in dementia patients.

Caregivers lack real-time digital biomarkers. Clinicians lack longitudinal decline tools. Pharma trials (Leqembi, Kisunla) lack scalable digital endpoints.

No dementia-safe alternative exists. Competitors replicate the pass/fail paradigm digitally.

THE SOLUTION

A platform built from the algorithm up for dementia.

THREE-STATE FEEDBACK

CELEBRATED / GUIDED / SUPPORTED — never negative. Architecturally guarantees no failure reaches the patient.

DEMENTIA BIOMARKERS

Speech hesitation, response time, sleep irregularity, routine disruption. Composite score for decline tracking.

FDA SAMD READY

Full documentation (IEC 62304, ISO 14971, QMS, CFR Part 11). 510(k) predicate identified. Pathway to Medicare reimbursement.

THE PRODUCT

Production-ready platform.

53K+ Lines of production code	**5** Deployed applications	**30+** API routes
30+ Database models	**10** Languages (RTL-aware)	**FHIR R4** EHR integration ready

5 deployed apps (iPad patient app, caregiver dashboard, clinician dashboard, admin portal, family dashboard) + Apple Watch. 10 languages with RTL. WatchOS HealthKit integration. FHIR R4 EHR integration. Multi-tenant architecture.

MARKET

$186B global market. $450M 5-year SOM.

$186B

TAM — Global dementia care

Global dementia care market (Alzheimer's Disease International, 2023)

$23B

SAM — Digital therapeutics

US digital therapeutics + digital health addressable segment

$450M

SOM — 5-year addressable

US memory care + DTx + MA contracts (5-year obtainable)

IP MOAT

23 patent-pending innovations.

5	7	11
Tier 1 Foundational	Tier 2 Strong claims	Tier 3 System-level

Valuation range: $22M-$57M (sum-of-parts, pre-seed)
All USPTO provisionals, 12-month priority window
Trade-secret parameters retained separately

TIER 1 HIGHLIGHTS:

- GR-01: Three-state positive-only feedback — the only architectural dementia-safe scoring system
- GR-02: Asymmetric adaptive difficulty for 70-85% comfort zone
- GR-03: Dementia-adapted spaced repetition (modified SM-2)
- GR-04: Multimodal cognitive state classifier
- GR-05: Dementia-specific speech emotion detection

REGULATORY PATHWAY

FDA SaMD Class II via 510(k).

DOCUMENTATION STATUS

IEC 62304 — Software Lifecycle	✓ Complete
ISO 14971 — Risk Management (FMEA)	✓ Complete
ISO 13485 — QMS Framework	✓ Complete
21 CFR Part 11 — Electronic Records	✓ Complete
STRIDE Cybersecurity Assessment	✓ Complete
Clinical Validation Protocol	✓ Drafted
510(k) Predicate Analysis	✓ Complete (K201738 Linus Health)

PREDICATE PATH

K201738 — Linus Health

Digital Clock and Recall; cleared 2020. Substantial equivalence basis.

K182554 — Cogstate

Brief computerized cognitive assessment. Secondary predicate.

Target: 510(k) submission within 12 months of seed close.
Clearance: 12-18 months from submission (P50 ~15 months).

BUSINESS MODEL

Multi-channel revenue. Defensible unit economics.

B2B FACILITY SAAS

$6,000 / bed / year

30,000+ US memory care facilities. Patient app + caregiver dashboard + clinical reporting. Annual contracts with 5% escalation.

B2B2C DTx (POST-510k)

$180 / patient / month

Provider-prescribed DTx. CPT-code reimbursable. Medicare + Medicare Advantage coverage target.

PHARMA LICENSING

$2M-$10M / deal

Digital endpoint for anti-amyloid therapy trials (Biogen, Eisai, Lilly). Upfront + milestones + royalties on outcomes.

PAYER VALUE-BASED CONTRACTS

Per-member outcomes

Medicare Advantage risk stratification. Cost-reduction sharing on early intervention.

PROJECTIONS

Path to $85M ARR in Year 5.

	Y1	Y2	Y3	Y4	Y5
Facilities	8	32	110	280	580
Patients	640	2.5K	8.8K	22.4K	46.4K
ARR	**$500K**	**$3.8M**	**$14M**	**$38M**	**$85M**

Y3+ includes DTx prescription revenue (post-510k clearance). Excludes $10M-$50M strategic pharma deals.

UNIT ECONOMICS

LTV/CAC of 60×. Top-quartile.

Facility ACV

$60,000

10 beds × $6K/year

CAC (Facility)

$3,000

Inside sales + pilot

LTV (Facility)

$180,000

37.5-month lifetime

LTV/CAC

60×

Top-quartile SaaS

Gross Margin

82%

Cloud SaaS + support

Annual Churn

8%

vs 10-15% benchmark

COMPETITIVE LANDSCAPE

Nobody else has built this for dementia.

COMPANY	FOCUS	WHY THEY LOSE
Linus Health	Digital cognitive assessment	Pass/fail delivery; not dementia-safe
Cogstate	Computerized cognitive testing	Trial-only; no caregiver platform
Neurotrack	Eye-tracking assessment	Narrow modality
Akili / EndeavorRx	Pediatric ADHD DTx	Different indication; collapsed post-IPO

OUR MOAT

23-patent IP portfolio architecturally blocks competitors. Only system with zero-negative-feedback scoring. Production platform is 18-24 months ahead of what a competitor could build from scratch. FDA SaMD documentation is unusually mature for the stage.

TRACTION

Pre-seed signals.

23

USPTO provisional patents

Full IP portfolio filed or in flight

53K+

Lines of production code

5 deployed applications

10

Languages supported

RTL-aware, ready for international

12

FDA SaMD documents

IEC 62304, ISO 14971, QMS, Part 11, STRIDE

3-5

Target memory centers

UCSF, MGH, Emory partnership prep

4

Non-dilutive grants drafted

NIA SBIR, R21, BrightFocus, Alz Assoc

TEAM

Experienced founding team + advisory in progress.

RECRUITING CLINICAL ADVISORY BOARD

- Dr. Bruce Miller / Reisa Sperling / Ronald Petersen (target)
- Dr. Constantine Lyketsos (caregiver burden expertise)
- Dr. Sandra Weintraub (neuropsychological assessment)
- FDA SaMD consultant (former CDRH reviewer)

TECH + AI ADVISORY (ASPIRATIONAL)

- Dr. Eric Topol (Scripps, digital medicine)
- Glen Tullman (Livongo founder, digital health operator)
- Dr. Atul Butte (UCSF, biomedical AI)
- Andy Slavitt (former CMS, payer strategy)

Seed round will fund clinical advisor recruitment + first technical hires (engineering 2, clinical PM 1).

We're raising

$5M Seed

$25M post-money

12-month runway to Series A readiness. Funds FDA 510(k), 3 facility pilots, engineering team build-out, and non-provisional patent conversions.

USE OF FUNDS

Every dollar allocated.

FDA 510(k) preparation + submission	$1.27M	25%
Engineering (6 FTE)	$1.42M	28%
Pilot deployments (3 facilities)	$600K	12%
IP portfolio (non-provisional conversions)	$600K	12%
Sales & partnerships	$450K	9%
Operations + reserve	$410K	8%
Clinical validation studies	$250K	5%

Let's build this together.

MILESTONES (POST-CLOSE)

M3	Seed close; FDA Pre-Sub meeting
M6	Pilot deployments live; SBIR Phase I submitted
M9	Clinical validation data released
M12	510(k) submission; Series A prep
M18	510(k) clearance; Medicare reimbursement application
M24	Commercial launch; Series A close
